THE BOTTLE: REBORN

Say hello to the new Cypress EcoSmart collection from Targus. It's one great step on our journey to creating products that are altogether more sustainable and thoughtful, from manufacturing to distribution. Good inside and out.

Targus is on a mission to recycle more plastic bottles than any other bag manufacturer. Plastic bottles are reborn to make everything from the bag lining to the body and trim, without compromising the brilliant flexible working features and ergonomic comfort you expect from us.

So always look for the EcoSmart Label before you buy and help us start turning the tide on ocean pollution and landfill in this critical decade. After all, we only have one planet: let's make the best of it.

Why choose a new Cypress EcoSmart bag?

Plastic bottles are reborn to make everything from the bag lining to the body and trim, without compromising the brilliant flexible working features, security and ergonomic comfort you expect from our bags.

We take recycled plastic bottles.

Reform them into plastic pellets.

Then convert the pellets into yarn.

Which is woven into material.

To produce our EcoSmart bags.

Always look for the EcoSmart Label before you buy.

Make your next decision a good one.

Our recycling credentials

GRS is a global full product standard which tracks and traces the full life of recycled material from pre-consumer to post-consumer. GRS tracks social, environmental and chemical requirements. The objectives of GRS are to define requirements to ensure accurate content claims and good working conditions, as well as to ensure that harmful environmental and chemical impacts are minimised.

Introduced to recognise the important role that recycling paper and timber plays in protecting the world's forests. Unlike general 'recycled' claims, which require no verification, the FSC Recycled label provides assurance that all the wood or paper in a product has been verified as genuinely recycled. Only products containing 100% recycled material can carry the FSC Recycled label.
