

Securing Identities Workshop

Creating a modern security strategy with Insight
and Microsoft Surface

Meeting the challenges of hybrid work

Protect user identities.

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape and improve your identity security posture.

Empower your hybrid workforce.

If your organization deploys Microsoft 365™ and Microsoft® devices, you're already ahead of the game when it comes to creating a secure, compliant and productive hybrid work environment. Insight can help take your enterprise to the next level, though, by providing expert support to ensure that you have everything you need to protect business data, proactively guard against threats, and manage identity and access controls.

In the following pages, we'll explore how a Microsoft 365 Securing Identities Workshop from Insight empowers your hybrid workforce to operate securely and confidently from any location. Then we'll take a look at some of the newest Microsoft Surface® devices and their built-in features to maximize security and productivity. Together, these offerings enable your organization to envision and prepare for modernization and realize the true benefits of hybrid work.

Identify. Assess. Mitigate.

The Microsoft Securing Identities Workshop from Insight enables your organization to understand the data risks that may reside in your environment and provides clear, actionable steps to address these risks.

This workshop starts by helping you identify data risks across your entire ecosystem before giving you a framework to assess your strategic objectives and priorities for compliance. Finally, you'll gain a greater understanding of Microsoft's approach to ensuring compliance and develop an action plan with long-term recommendations for mitigating compliance risks.

Who should attend?

The workshop is intended for security decision-makers such as:

C-suite	IT security
Chief Information Security Officer (CISO)	IT operations
Chief Information Officer (CIO)	Security architects
Chief Security Officer (CSO)	Security engineers
Identity and or application owners/decision-makers	Application business owners

Designed as a three-day engagement, the Securing Identities Workshop enables partners to assess the maturity of a client's identity estate. By making use of Secure Score and application discovery tools, this workshop gives clients visibility into their present state and will help define clear next steps and the best way to mitigate risks.

Client benefits of the Securing Identities Workshop

This workshop will help you design and plan out your optimal identity model to ensure you have a roadmap for enhanced security.

Optimize identity —

Identify potential risks related to identity and see opportunities for improvement.

Reduce cost —

Minimize expenses associated with password reset and help desk resources.

Assess security posture —

Receive a numerical rating of your identity security posture and see how it compares to similar organizations.

Increase visibility —

Get a sample survey of apps your employees are using and if IT supports them or not.

Workshop overview

Step 1 Pre-workshop

Kickoff meeting

- Review expectations, goals, scope and deliverables.
- Introduce stakeholders and establish meeting expectations and cadence.

Step 2 Discovery

Initial security strategy session

- Discuss strategic vision.
- Identify opportunities.

Environment discovery and data collection

- Working sessions to run scripts and provide output

Step 3 Workshop

Microsoft 365™ Security overview

- Security strategy recap
- Service overview

Workshop results and recommendations

- M365 Security findings
- Readiness, recommendations and roadmap
- Project close-out and next steps

If you'd like to know more about how Insight can help you optimize your security environment with a Microsoft 365 Securing Identities Workshop, schedule a meeting with one of our reps.

Devices for modern work

When you choose new Microsoft Surface® devices from Insight, you equip your workforce with powerful and secure devices designed to meet the needs of modern workers. Get to know these stunning new machines and learn how they can help you increase employee engagement, satisfaction and power.

Surface Duo 2

Unlock real value for your business with technology that empowers your employees to work securely from anywhere. Employees discover limitless possibilities in the moment, wherever they are, with lightning-fast 5G for **Surface Duo® 2**.

More than a phone, the Surface Duo 2 has protection built in at every layer to keep your devices, identities and data secure. Authenticate and power on with one-touch sign-in on the Fingerprint Power Button.

Deploy, manage and protect from anywhere.

Surface Go 3

Designed to serve customers better from the front line, the faster, ultra-versatile and always-connected **Surface Go® 3** delivers compact tablet-to-laptop flexibility for work on the go.

Keep company information and customer data safe, whether devices are on-site or in the field.

Get the most from Microsoft® 365™, with Windows® 10 or Windows 11 Pro, the protection of Microsoft Enterprise Mobility + Security and the productivity apps you rely on every day.

Gain more control with cloud-first device management using Microsoft Endpoint Manager and DFCI.

Simplify IT with zero-touch, Windows Autopilot deployment straight to employees.

Restrict access to only the apps and tools customers or employees need in Kiosk Mode.

Surface Laptop Studio

Surface® Laptop Studio represents the culmination of nearly a decade of exploring new design and performance possibilities, offering incredible performance and delivering the highest graphics horsepower of any Surface Laptop.

This powerful machine enables seamless transition from best-in-class laptop to a natural angle for docking to a full-performance canvas, and every detail is built to fuel inspiration, from the display to the battery life to the speakers and pen.

Save time and money with streamlined deployment, modern device management and built-in cloud-powered security and watch as your investment in Surface makes an impact that goes beyond your business.

Three modes to match your versatility. Surface Laptop Studio can be a laptop for documenting test results, a canvas for drawing on charts or images and an interactive way to share information on screen.

Keep personal identifiable information safe and secure with enterprise-grade, chip-to-cloud security built right in.

Totally mobile. Fully equipped.

Surface Pro X

Empower employees to make meaningful connections anytime, anywhere with **Surface Pro X**. Designed to deliver the best of Windows 11, Surface Pro X makes quick work of every task with tablet-to-laptop flexibility, an HD camera, the power of Artificial Intelligence (AI) and long-lasting battery life.

Remote manageability, security and compliance matter more now than ever. Surface Pro X features built-in chip-to-cloud security, remote management and optional LTE Advanced Pro so workers stay secure from anywhere.

Insight for Surface devices

When you partner with Insight to bring cutting-edge Microsoft Surface devices to your enterprise, you're not just putting powerful tools in your employees' hands — you're making sure that they have access to the in-depth support and expertise they need to get the most from your hardware investment. From device lifecycle management to help desk support to ongoing training and workshops, Insight can help you get the most from Microsoft Surface and beyond.
